DATE MAILED: 10/19/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/028,379	Applicant(s) CHRISTIAN ET AL.	
	Examiner Chuc D Tran	Art Unit 2821	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7,9-11 and 19-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 12 and 15-18 is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-7,9-11 and 19-21 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 December 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, and 9-11, drawn to a high and low power supply includes a low power dissipating switching network, classified in class 330, subclass 297.
 - II. Claims 12, and 15-18, drawn to a positive and negative polarity convergence circuit includes a high, low positive voltage rails and a high, low negative voltage rails and switching network which operates relative to the high positive and negative voltage rail, classified in class 315, subclass 368.
 - III. Claims 19-21, drawn to a polarity convergence circuit including a high and low voltage rails connected to the output stage, and a switching network switches the connection of the output stage to the polarity convergence circuit between the high and low voltage rails relative to the high voltage rail, classified in class 315, subclass 382.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II (claims 12, and 15-18) and I (claims 1-7, and 9-11) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not

Art Unit: 2821

require the particulars of the subcombination as claimed because the combination (group II) does not require a low power dissipating switching network. The subcombination has separate utility such as audio frequency signal amplification, electric motor drivers, etc. that merely controls the high positive and negative voltage rails in the convergence circuit of the cathode ray tube.

4. Inventions I (claims 1-7, 9-11) and III (claims 19-21) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (group I) does not require the output stage. The subcombination has separate utility such as a projection television instruments, a TV system, etc. that merely controls the high and low voltage power supply or the like.

5. Inventions II (claims 12, 15-18) and III (claims 19-21) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (group II) does not require a particular polarity convergence circuit connected to the output stage. The subcombination has separate utility such as an amplifier circuits.

Because these inventions are distinct for the reasons given above and have acquired a

Art Unit: 2821

separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with Mr. Darrin Wesley Harris on 9/28/04 a provisional election was made with traverse to prosecute the invention of group II, claim 12, 15-18.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-7, 9-11 and 19-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

7. Claims 12, and 15-18 are allowed.

8. The following is an examiner's statement of reasons for allowance:

Regarding claim 12, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in the claim: a positive polarity convergence circuit including a high positive voltage rail and a low positive voltage rail; a negative polarity convergence circuit including a high negative voltage rail and a low negative voltage rail; and wherein the positive and negative polarity convergence circuits further include a switching network which operates relative to the high positive voltage rail and the high negative voltage rail.

Regarding claims 15-18 are allowable for the reason given above because of their dependency status from the claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2821

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. This application is in condition for allowance except for the following formal matters:

The Applicants have to cancel the non election claims 1-7, 9-11 and 19-21.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **30 days** from the mailing date of this letter.

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuc D Tran whose telephone number is (571) 272-1829. The examiner can normally be reached on M-F Flex hours.

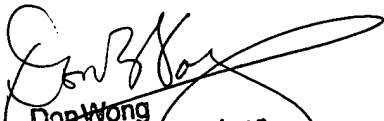

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
